-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 36, drawn to a system for establishing a secure communication channel.
- II. Claims 9-20 and 37 drawn to processing information received via a secure communication channel.
- III. Claim 21-35, drawn to determining the appropriate security association, in a database, for an incoming packet.

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

- In the instant case, invention II has separate utility from invention I such as use in a system that has a secure communication channel established by SSL.
- In the instant case, invention III has separate utility from invention I such as use in a system that has a secure communication channel established by SSL.
- In the instant case, invention III has separate utility from invention II such as setting the security association data structure into memory for use in encrypting outgoing packets.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I contains the classification 707/205 which is not required for Groups II and III, the search required for Group II contains the classification 370/392 which is not required for Groups I and III, and the search required for Group III contains the classification 711/202 which is not required for Groups I and II, restriction for examination purposes as indicated is proper.
